After the product has dried (approx. 2/4 hours later), sand and level the surface. In case of elevates thickness (more than 3 mm), it is advised to fill up with more applications. After sanding and brushing the surfaces, proceed with the desired painting method.
<b>Practical advice</b>	<p>Environmental and surface conditions: room temperature: min. 5°C / max. 35°C; relative humidity: &lt;80%; surface temperature: min. 5°C / max. 35°C; surface humidity: &gt;10% R.H.</p> <p>After use and before closing the can, spread a layer of water on the surface of the product to prevent it from hardening. For subsequent uses, remove the film of water and reuse the product.</p> <p>Do not return dry or dirty residues to the container Clean tools with water immediately after use</p>
<b>Safety data</b>	<ul style="list-style-type: none"><li>• Keep the tin tightly closed, in a cool place away from heat sources.</li><li>• User safety information are contained in the related safety sheet.</li><li>• Empty containers, or with traces of dried product film, must be disposed of according to local regulations.</li></ul>

Specifications and other technical information	Method	Main data at 20°C and 60% relative humidity
Coat finish and aspect gloss		Matt
Density g/ml	UNI 8910	1,780 ÷ 1,880
Viscosity		Tixotropic
Calculated spreading rate (for a thickness of 1mm) m <sup>2</sup> \ Kg		1 ÷ 2
Recommended dry film thickness microns per coat		1000 ÷ 1500
Flash point °C	UNI 8909	Not flammable
Shelf life (in cool and dry place)	UNI 10154	At least 24 months
Hard dry hrs		24
Dry to recoat hrs		6 ÷ 8
Dry to sand hrs		After 2
Surfaces of application		Interiors
Colours		White
Binder		Vinyl
Tool cleaner		Water
Spatula application		Ready to use
